

## REMARKS

The Office Action of December 8, 2004 resulted from the examination of claims which are not a part of the present application. Specifically, that Office Action indicated that claims 1-64 are pending in this application, with claims 51-64 having been withdrawn and claims 1-50 having been examined. The examined claims each relate to an ATM machine.

The present application claims priority to PCT Application No. PCT/KR00/00116, which was published as Publication No. WO 01/13346 A1, a copy of which is enclosed herewith. As is evidenced from the priority application, the present application relates to a surveillance camera and a surveillance camera image processing method. Further, only six claims are included in the priority application, and Applicant has not amended the claims in the present application. Thus, the six claims of the priority application remain the only claims active in the present application. Examination of these six active claims is requested.

Respectfully submitted,

FULBRIGHT & JAWORSKI L.L.P.
